Navy Supply System and ILS Certification Panel:
Is the Fleet getting the Technical Data that It Needs When It Needs It?_

General Supply System

Many people are unaware of, or confused by how the supply system works. There are authoritative data sources, like NLL, TDMIS and CDMD-OA. Then there are applications that use the authoritative data sources, like TDKM, TMPODS and TLMS. What are these entities, how do they work together, and how does it serve the fleet?

General Supply System, con't

How is the Navy Supply System and the distribution of technical data adapting to web-centric technologies, and is the fleet able to benefit from these technologies?

Integrated Logistics Support

What is meant by “ILS” Certification AND does it mean the same thing to everyone?

Integrated Logistics Support, cont

What is “embedded data” and how will/does the ILS Certification process deal with it? If there is no concrete answer, how should it?

Integrated Logistics Support, cont

With ILE in mind, and it's anticipated impact to technical data as a whole, what challenges do you see in ILS Certification and distribution?
